

# Company Profile

Engineering Consulting & Management

## ABOUT TNM

TNM is an international civil engineering consultant, multi-discipline company, founded in 1988 and active in more than 20 countries in Latin America, Africa, Europe, and Asia, to enhance and improve the infrastructure sector by utilizing technology transfer, highest quality standards, and excellent client service.

TNM has been able to become one of the leading companies in its field, providing a variety of tailor-made comprehensive solutions to complex problems for the entire life cycle of every project and the ability to successfully combine various disciplines, in order to provide creative and unique solutions.

TNM has vast expertise in fields like project management, quality control, quality assurance, pavement management systems, investment plans, transport policy, optimization under a limited budget constraint, transportation, road engineering, road planning, the economic feasibility of transportation infrastructure programs, road construction technology, etc.

# OUR SERVICES

## Engineering consulting and management

TNM is providing full engineering support to projects from conceptualization, to the feasibility study, then detailed design, financing, project management and supervision, operation, and maintenance for roads, bridges, tunnels, ports, airports, and railways.

Additionally, TNM initiates and manages private financing initiatives (even build operate transfer projects) and implements public-private partnerships, always using up-to-date technology, advanced procedures, and the latest management systems

## Quality Assurance

Quality Assurance is another field that TNM pioneered in.

Quality Assurance and Quality Control are based on the application of procedures to ensure that the required level of performance is met and avoid problems that can be attributed to poor quality by correcting them during construction.

## Integral Road Design

TNM has been rendering road consulting services and widening its experience in different disciplines that comprise the field of road design, using the latest computerized tools, software, and technology, in order to continue being a leading company in the road sector.

The areas include Geometric Design; Geological, Geotechnical Studies; Hydrological studies; Pavement Design; Bridge Structural Design; Hydraulic Studies; Environmental Studies; Urbanism and Public Space Designs for urban roads; Material Resources; Specialized Software Design.

## IT, Asset Management, Data collection, and Innovation

TNM has continuously invested considerable resources to create diverse software solutions in line with the company's core competencies such as a planning tool that has a database, that stores and presents road data information, planning short and long-term road maintenance including budgets that maximize economic returns of the investments made for the road network. TNM combines practical experience in engineering, economics, document management, GIS, and quality management with knowledge and experience in deployment techniques.

## Output Performance-based Road Contracts Management

TNM specializes in preparing tender documents, project supervision, and management following the Output and Performance Based Road Contracts (OPRC) methodology funded by financial institutions such as the World Bank, where the Client pays upon fulfillment of pre-defined specific levels of service. Additionally, TNM provides support to the Clients during the procurement process, working in liaison with the client's staff
